CAREER SUMMARY:

I have a solid understanding of programming, with skills in Java for building applications and solving problems. I am proficient in data structures, which help me organize and manage data efficiently for optimized performance. Additionally, I am skilled in web development using HTML, CSS, and JavaScript to create responsive and interactive websites. I am always eager to learn and improve my abilities to build effective and user-friendly solutions.

RELEVANT PROJECTS:

Landing page

A simple landing page for a packing and moving website

Portfolio

A simple portfolio website showcasing my skills and talents

Simple Calculator

A calculator website using HTML, CSS and JavaScript that perform mathematical operations
